New S Series from Black Bruin

Sampo Hydraulics Ltd. has developed a new rotating shaft series of motors to accompany the traditional rotating house Black Bruins. At 350 kW, the robust S Series is the most powerful Black Bruin to date. Hollow shaft construction, axial and radial load carrying capacity and shift on the fly multi-speed function makes the S Series an excellent choice for various applications.

■ For augers, drills, conveyors, crushers, winches, etc.

Benefits of the Black Bruin® S Series

- Heavy Duty design for continuous high power
- Tapered roller bearings to take axial and radial loads
- Wide speed range, up to 180 rpm

Features of the Black Bruin® S Series

- Multi-speed function with shift on the fly
- Expandable from single row up to triple row cylinder block design
- Backed by over 50 years experience in the most demanding applications

PART NUMBER	DISPLACEMENT (ccm)	MAX. SPEED (rpm)		MAX. POWER (kW)		MAX. PRESSURE (bar)		MAX. TORQUE (Nm)		WEIGHT (kg)
		Working	1/2 displacement	Working	1/2 displacement	Peak	Intermittent*	Peak	Intermittent*
